MILITARY TRAINING AREA  
LVOV, USSR  
CARPATHIAN MD

A 25,000-acre training area located 19 miles (30.4 kilometers) northwest of Lvov and 14 miles (22.4 kilometers) northeast of Yavorov at 50-02N 023-40E (Figure 1) contains a probable tracked-vehicle driver training course, a wheeled-vehicle driver training course, three moving target tank firing ranges, and one probable moving target tank firing range.

One moving target tank firing range contains two target runs with a maximum distance from the static firing line to the target of 4,025 feet, and three 2,750-foot firing lanes.

A second moving target tank firing range contains one target run with a target distance of 3,000 feet, and four firing lanes (three 1,100 feet long and one 1,400 feet long).

A third moving target tank firing range contains two firing runs with a maximum target distance of 4,900 feet, and three 2,975-foot firing lanes.

The probable moving target tank firing range has a maximum target distance of 4,250 feet and contains an undetermined number of firing lanes and target runs.

The area has been heavily scarred by vehicular traffic and contains numerous infantry trenches and several probable artillery positions. The training area is road served. No rail lines were observed.

A comparative study of seven KEYHOLE missions from [REDACTED] revealed no significant change in facilities. The area was consistently active during the summer months. On [REDACTED] the area was lightly snow covered and usage during this period could not be determined.

No artillery impact areas, bivouac areas or tent camps, engineer training and water-crossing training sites, airborne or air transportability training facilities were observed.
